EXPERIENCE

USYTECH, Cairo, Egypt — Lead *Front-End Developer*

Jan 2015 - PRESENT

- Building (freelancing platform) using **React JS, NextJS, Redux and Material-UI**
- Building and releasing new features in EagleRider (bike rentals e-commerce)
- Leading stack migration to **React JS, NextJS, and Material-UI** from legacy **jQuery** and ruby server-side rendering.
- Planning migration milestones, shipping gradually migrated components to living code, and managing other FE devs efforts to achieve milestones.
- Enhancing checkout pages performance funnel, in these efforts, decreasing page load and perceived loading time, this resulted in increasing Avg session duration by **4.20%** and decreasing bounce rate by **8.79%** eventually those wide changes resulted in avg increase of conversion rate by **10.70%**.
- Leading a team of 5 Developers.

Hindawi Foundation, Cairo, Egypt — Senior *Front-End Developer*

Mar 2014 - Jan 2015

- Cooperating with the Development team to fix issues in the Epub Generator.
- Cooperating with the Mobile team to fix issues in Epub rendering.
- Refactoring the structure of Epub box and using oriented style, (As a result, the CSS diminished from **180k** to **5k** after refactoring, which made the books app render the Epub faster).
- Fixing JS issues in hindawi.org and internal projects.
